Pump Centre

Scottish Water mini conference

Last month, we hosted our mini conference in partnership with Scottish Water. The theme of this year's Scottish conference was 'Standardisation for a Net Zero Future', with the aim of highlighting some of the opportunities for standardisation and

how this can help reduce **Scottish Water's carbon emissions**. It was great to catch up with our members and discover the latest technologies and solutions they are providing for the **water industry**.

WES2023 theme: "Delivering a step change in efficiency"

Planning for next year's Water Equipment Show has already started, and we're looking forward to next year's event, which is free to attend. We will be focusing on 'delivering a step change in efficiency'.

In the water industry, there is now a sharper focus on delivering efficiencies than ever before. Therefore WES 2023 will provide the perfect opportunity for companies to discuss the route they are taking to deliver improved efficiency, and how their innovative solutions and customer/supply chain partnerships have been successful.

For more information about next year's show and how to register, visit our website at www.waterequipmentshow.com

Young Engineer Award nominations last call

Do you know someone worthy of a **Young Engineer Award**?

Next year's Young Engineer Awards are looming, and your chance to nominate someone is running out. Don't miss out on your opportunity to recognise and support young talent within your company!

Visit www.waterequipmentshow.com for more information about completing the nomination form. **Nominations close on the 25th November.**

RSE rising star award

Pump Centre member, **RSE** won Graduate Rising Star of the Year at the Water Industry Awards.

RSE Graduate Kathryn Dalglish was recognised for the award due to her significant involvement in the management of projects during her graduate apprenticeship with RSE.

A huge congratulations to Kathryn on this achievement, from everyone here at the Pump Centre!

If you have a rising star in your company, don't forget to nominate them for the Pump Centre's Young Engineer Awards.

Funding opportunities: Ofwat Breakthrough Challenge 3

Ofwat Water Breakthrough Challenge 3 (Breakthrough 3) is now open for entries in both the catalyst and transform scheme.

The Challenge aims to spark ambitious innovation and enable new approaches and ways of working; equipping the water sector to address the big challenges facing the sector.

Water companies in England and Wales will be able to bid for the funding with £38 million available for innovative initiatives which deliver benefits for customers, society and the environment.
